

GUIDELINES

Approved Products for Works – Information to be submitted for Application

These guidelines apply for companies who wish submit products for inclusion on the Hunter Water Corporation (HWC) Approved Products List in the following infrastructure areas:

- Water reticulation network
- Sewer gravity or pressure system

It should be noted that a product may be included on a list with restrictions.

The following areas are to be covered by the applying company:

- Area to be considered for:
- Details of Product, including:
 - Manufacturer name, contact details and factory location
 - WSAA Appraisal Report
 - Details of Standards Australia WaterMark certification
 - Details of compliance to relevant Australian or International Standards, etc. (Include copies of the license / certification for verification)
 - Details of spares held by company and lead time required for spares from manufacturer
 - Product Specifications (Provide technical specifications for the Product including design drawings)
- Size and structure of manufacturer
- Whole of life cost analysis
- Relevant referee's for the product including:
 - Type of product installed
 - Application of product and any special conditions applied to the application
 - Number of products installed
 - Relevant referee contact details
- Time manufacturer has been in business
- QA systems used by manufacturer

All product applications are to be submitted in writing to:

Phillip Townsend
Civil Asset Engineer
