

HUNTER BUSINESS WATER SAVERS PROGRAM 2014

Hunter Water in partnership with the Hunter Business Chamber is offering a new water efficiency program in 2014.

The program helps businesses improve water efficiency in amenities and commercial kitchens.

The Hunter Business Water Savers Program is conducted by Hunter Water in partnership with the Hunter Business Chamber. The program aims to improve water efficiency in amenities and kitchens through retrofits of water efficient devices.

Benefits

By participating, your business can expect to:

- Save money on water and energy bills.
- Reduce amenity and kitchen water use by up to 30%.
- Build a profile in the community as a water efficient business.
- Have the opportunity to receive a \$10,000 subsidy to go towards a larger water efficiency project.

Upon joining the Program, Hunter Water will:

- Organise a qualified plumber to audit your bathrooms, kitchenettes and commercial kitchens.
- Deliver a report outlining actions to improve water efficiency and a price to implement those actions.

Note: the recommended actions are designed to give a cost effective payback of generally two years or better.

Costs

- You may be required to pay a \$400 (+GST) audit fee. This fee is not required if:
- No savings are identified; or
- At least 80% of the cost effective actions are implemented by 30 June 2014.

Implementation

The cost of supplying and installing the products depends on the work required and will be outlined in the audit report.

Eligibility

The Program is limited to 20 customers. To be eligible for the Hunter Business Water Savers Program your business must have:

- Been invited to participate by Hunter Water.
- Use at least 2,000kL per year (average of 670kL per bill).
- Read and accepted the Terms and Conditions of the Program.

You are invited to register for the Hunter Water Business Savers Program. Registration for the Program closes 29 January 2014 or earlier if all places are filled.
