

Hunter Water S170 Register

SHI No.: *Name:*
3630042 Cardiff South Water Pump Station

Location Lot 1 Maud St, Cardiff South NSW 2285

Other ID nos IW ID: 42. Other ID: WSCAS015.

Description:

A blond brick and rendered building, with a stopped hip Marseille tiled roof with timber louvers to gables and boxed eaves. The building has colorbond guttering and downpipes, with some minor rot to the fascia on the eastern side. Doors are framed and sheeted.

Significance:

Cardiff South Water Pumping Station is a late but well-designed water pumping station associated with adjacent steel tank reservoirs. The building continues the traditional style of Hunter Water Water pumping stations used in the 1930s and 1940s and make a positive aesthetic contribution to the surrounding area.

Assessed Significance: Local

Endorsed Significance: Local

Historical Notes:

Constructed: c. 1952

Construction of a brick pump house at Cardiff reservoir was in progress at the end of the 1952/53 financial year.

Designer/Builder: Hunter District Water Board

Current Use: Water pumping station

Former Uses:

Physical Condition:

Further Information:

Located within reservoir complex.

Recommended Management:

- This item contributes to local character and should be conserved.
- Original details should be maintained including doors, windows and original signage.
- New materials should be sympathetic to the nature and character of the original building.
- In the event of major proposed changes, prepare a Conservation Management Strategy and undertake an archival recording.
- Wherever possible, changes should be restricted to the interior of the building.
- Routine maintenance of existing fabric is essential.
