Work in your area – Murray Street open trenching

As you are aware, we are constructing a new water main in your area that will distribute treated water to the network from the Belmont Desalination Plant once it is complete.

Upcoming open trenching works

Open trenching to install the new water main in **Murray Street** is scheduled to start from **Monday 13 July 2026** and take up to three weeks to complete, assuming the weather is fine and there are no major issues.

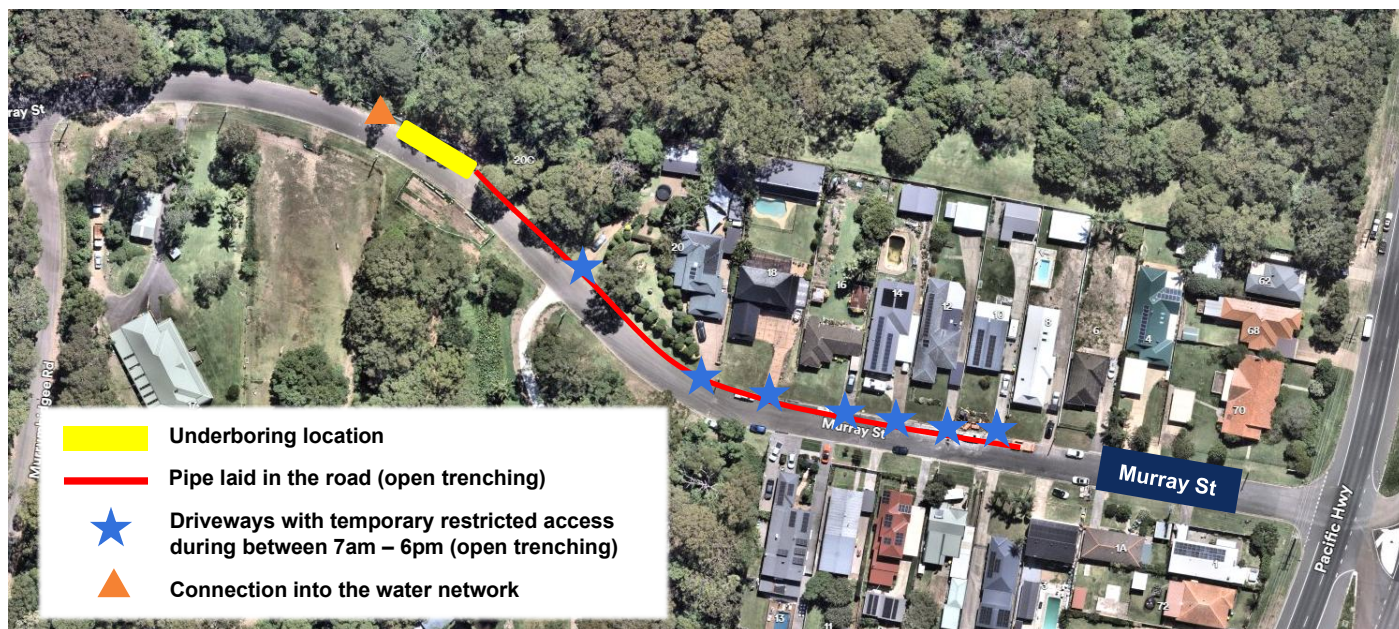

During this time the following traffic arrangements will be in place:

- A temporary single lane closure around the work area during working hours.
- Traffic controllers onsite to assist motorists and pedestrians during daytime working hours (7am to 6pm, Monday to Friday) with temporary traffic lights in use outside of these hours if required.

There will also be some **temporary traffic changes**, including the removal of street parking and restrictions to driveways to keep everyone safe.

You may notice noise, construction vehicles and equipment operating during the construction however there aren't any planned interruptions to your existing services.

Our aim is to minimise inconvenience to you, and we thank you for your patience.

More information

If you would like more information about the project, including maps timing of works and FAQs please visit the project website by scanning the QR code to the right.

You can also email utilities.community@srgglobal.com.au or phone SRG Global Utilities on **1300 131 338**.

This work is being delivered by SRG Global on behalf of Hunter Water.
