Work in your area – Murray Street, Jewells road restoration

Hunter Water is nearing completion of a new water main in Jewells to distribute treated water from the Belmont Desalination Plant, which is under construction, to our customers and network.

Upcoming road restoration works

We have successfully tested the new water main in Murray Street, Jewells which means we can now restore the road, verges and other areas affected by our work. This will include new asphalt, line marking and rehabilitation to any other construction affected areas including the temporary compounds.

These works are scheduled to begin from the **week of 25 October 2026** and are expected to take one week to complete, assuming the weather is fine and there are no major issues. Our works will start at top of Murray Street, close to the Pacific Highway and progressively move along the construction corridor.

During this time, you will notice temporary changes to traffic and parking on Murray Street and noise from construction activities and crews operating plant and machinery.

Temporary traffic and parking changes

During our restoration works, temporary traffic and parking changes will be in place as work progresses along Murray Street.

Traffic changes will include:

- **Temporary single lane closures** within the work areas and traffic controllers on site between 7am – 6pm, Monday to Friday.
- **A reduced speed limit of 40km/h**, with a single traffic lane operating through the work zone.
- **Temporary removal of on-street parking on** Murray Street next to our restoration area.
- **During our working hours**, there may be short periods where driveway access is temporarily affected while work is carried out. Our team will work with you to minimise any delays.

Where possible, residents are encouraged to park outside the work area while restoration is happening in front of their home. We'll let you know at least **24 hours before work begins** in front of your property. Our aim is to move quickly, with work typically lasting **one to two days per property**.

More information

If you would like more information about the project, including maps, project notifications and FAQs please visit the project website by scanning the QR code to the right.
