Our Ref: HW2018-1118/12/8

Hello from Hunter Water

Watermain work – Turton Road

Hunter Water is rehabilitating our stormwater network in Waratah, which involves relining over 250 metres of stormwater culverts located near you – along Platt Street, Waratah. Our contractor Abergeldie Complex Infrastructure (Abergeldie), is doing this work on our behalf.

Partial Road Closure

In addition to our work at Platt Street, we will be reconnecting the diverted water mains under Turton Road near the intersection with Platt Street. The water mains were diverted to allow us to work safely in the stormwater culvert. This work is likely to take approximately 2 days to complete from **Thursday 21 November 2024**, weather and works permitting. We've included a map showing the location of the work.

This work will be carried out during our normal work hours of **7am until 6pm Monday to Friday and Saturday from 8am to 1pm**, weather permitting.

How will this affect you?

One side of Turton Road will be closed with traffic control in place, maintaining traffic both ways through the roundabout at Prince Street.

Our aim is to minimise inconvenience to you, we thank you for your patience during this work.
