

## Water Quality Summary - November 2019

Hunter Water provides safe and reliable drinking water to over half a million customers in the Lower Hunter. The drinking water we supply is routinely tested throughout our water supply systems.

### Whole of Hunter Water Distribution System

Drinking water results for the distribution system are based on samples representative of water supplied to customer's taps. Distribution system results for microbiological and key physical/chemical parameters are summarised below.

**Notes**

<sup>^</sup> Water sourced from the Tomago Borefield -when operational -is delivered to Grahamstown WTP via the East Main. When the Tomago Borefield is not being used as part of the drinking water supply mix for the Lower Hunter, the East and West monitoring points are both representative of water sourced from Grahamstown Dam.

<sup>\*</sup> Gresford WTP can be supplied from either the Allyn or Paterson Rivers. The plant was supplied from the Paterson River for the month.

<sup>#</sup> One sample is collected per month in the Gresford Zone
