4	Discharge Point	Property sewer point of connection		
5	Premises	Address of Property discharging Trade Waste		
6	Activities Undertaken on Premises	Food Preparation		
7	Commencement Date	<i>day/month/year</i>		
8	Expiry Date	5:00pm on day/month/year		
9	Treatment Plant	BURWOOD BEACH		
10	Sampling and Testing	3 Inspection per 5 years 3 Samples per year		
11	Treatment Equipment	Name	Size / Capacity	Quantity
		Grease Trap	xxxxL	1
12	Substances	Name	Concentration	Maximum Daily Discharge Mass
		BOD (Biochemical Oxygen Demand)	Not to exceed 500mg/L	N/A
		COD (Chemical Oxygen Demand)	Not to exceed 1500mg/L	N/A
		NFR (Non-Filterable Residue)	Not to exceed 500mg/L	N/A
		pH	Not to be less than 6.5 or greater than 10	N/A
		Water Temperature	Not to exceed 38 Degrees	N/A
13	Permitted Discharge Days	7		
14	Permitted Discharge Hours	24 Hours on Permitted Discharge Days		
	Maximum Instantaneous Discharge Rate	N/A		
	Maximum Daily Discharge Volume	Not to exceed xxx kilolitres/day		
15	Reporting Obligations	Frequency	Obligation	

Item	Matter	Variable			
		Immediate Reporting	The applicant must report by telephone to the Hunter Water Corporation Contact Centre (1300 657 000) and by Facsimile Transmission to the Manager, Treatment Operations (Fax 4979 9492) any event that causes or is likely to cause an exceedance of Agreement conditions.		
		General Reporting Format	General Reporting Format Data compiled, collected or recorded during the currency of this Agreement must be identified by the name of the Applicant and the location of the discharge point(s). The following reference number must be reported in all correspondence to the Hunter Water Corporation, regarding the reporting of data compiled, collected or recorded as required by the Agreement.		
16	Fees and Payments	<p>The Customer shall pay such amounts as Hunter Water may from time to time determine for the discharge of Trade Waste to the Sewer. These costs will be levied on the Customer with the normal water sewer account.</p> <p>Such amounts based on the fees for allowable concentration of the discharge to Sewer as determined by The Independent Pricing and Regulatory Tribunal of NSW (IPART). These fees and allowable concentrations are published in the HWC Trade Wastewater Policy and on the Hunter Water website at www.hunterwater.com.au</p>			
17	Backflow Prevention	<p style="text-align: center;">Compliant / Non-Compliant</p> <table border="1" style="width: 100%; border-collapse: collapse;"> <tr> <td style="width: 30%; text-align: center; vertical-align: middle;">Non-Compliant</td> <td style="vertical-align: top;">It has been identified that the property does not comply with Hunter Water's requirements for site containment backflow prevention. The owner must install at their own cost a site containment backflow prevention device that meets the hazard rating for the use and type of property. The location of the device shall be located at the property boundary at the outlet of the water meter on domestic services and after the inlet valve on all fire services. The device must be installed and maintained in accordance with the requirements of AS/NZS 3500 and AS/NZS 2845.</td> </tr> </table>		Non-Compliant	It has been identified that the property does not comply with Hunter Water's requirements for site containment backflow prevention. The owner must install at their own cost a site containment backflow prevention device that meets the hazard rating for the use and type of property. The location of the device shall be located at the property boundary at the outlet of the water meter on domestic services and after the inlet valve on all fire services. The device must be installed and maintained in accordance with the requirements of AS/NZS 3500 and AS/NZS 2845.
Non-Compliant	It has been identified that the property does not comply with Hunter Water's requirements for site containment backflow prevention. The owner must install at their own cost a site containment backflow prevention device that meets the hazard rating for the use and type of property. The location of the device shall be located at the property boundary at the outlet of the water meter on domestic services and after the inlet valve on all fire services. The device must be installed and maintained in accordance with the requirements of AS/NZS 3500 and AS/NZS 2845.				
18	Special Conditions	Ensure the Grease Traps are serviced by a licensed liquid wastewater contractor at intervals not exceeding 12 weeks or more frequently if advised by the contractor. Cleanout documentation is to be kept on site for future inspections.			
	Special Conditions (continued)	<p>(a). For the purpose of avoiding unintended discharges to the Sewer or the stormwater drainage system, all matter and substances on the Premises must be processed, handled, moved and stored in a proper and efficient manner.</p> <p>(b). Any substance on the Premises which, if discharged to the Sewer, may pose a danger to the environment, the Sewer or workers at a waste water treatment plant or may harm any sewage treatment process must be handled, moved and stored in areas where leaks, spillages or overflows cannot drain by gravity or by automated or other mechanical means to the Sewer or the stormwater drainage system.</p>
